## **PRESS RELEASE: Ukiah Police Launches New and Improved Website**

---

**Date:** 12/17/25

The Ukiah Police Department is pleased to announce the launch of its newly refreshed and updated website, now live at [www.ukiahpolice.com](http://www.ukiahpolice.com). The redesigned site offers improved accessibility, updated content, and new tools designed to better serve the Ukiah community.

One of the new features allows community members to file business burglary reports online, providing a convenient and efficient option for reporting certain crimes. The website also includes an anonymous tip submission feature, allowing individuals to share information with the Police Department while maintaining their privacy. You can find these new options under the *Report A Crime* tab.

In the near future, the Ukiah Police Department will be adding an additional feature called Citizen RIMS. This new tool will replace the Department's previous press logs and will allow the public to view reported crime activity by specific geographic areas within the city. Citizen RIMS is designed to increase transparency and provide residents with easier access to crime data relevant to their neighborhoods.

The Ukiah Police Department encourages residents, business owners, and visitors to explore the new website and learn more about the services and resources now available online.

For more information and to view the new website, please visit [www.ukiahpolice.com](http://www.ukiahpolice.com).
